PRITAM SAHA

Bengaluru, Karnataka | pritamsaha2404@gmail.com | +91 62910 67273

PROFESSIONAL SUMMARY

Quality & Trust-and-Safety professional with 3+ years at Amazon Prime Video in content classification, policy compliance, and AI/ML data evaluation. Hands-on with building practical internal tools using AI assistants and prompt engineering to automate manual review work and reduce quality defects. Currently transitioning toward Data / Risk Analytics, actively building skills in SQL, Python, and BI reporting. Known for turning messy policy and audit data into structured, decision-ready insight.

KEY SKILLS

Analytics & Data	SQL (queries, joins, aggregation) • Excel (pivot, lookups, data cleaning) • Power BI dashboards • data validation & QA
AI / GenAI	Prompt engineering • LLM-assisted workflow design • AI model-output evaluation • building tools with AI coding assistants
Programming	Python (foundations, scripting; actively learning) • JavaScript / React • HTML/CSS
Domain	Trust & Safety • content classification & maturity ratings • policy/SOP compliance • calibration & audit QA • data labeling

PROFESSIONAL EXPERIENCE

Quality Auditor • Amazon Prime Video ***(Jan 2024 – Oct 2026)***

- Audited maturity-rating and content-descriptor classifications for the Australia catalogue, checking auditor decisions against policy SOP and raising correction tickets for mis-predictions.
- Ran a team-wide calibration analysis that quantified where ratings diverged most, reframing recurring errors as ambiguous rules rather than individual mistakes.
- Evaluated AI/ML training data and model outputs, flagging labeling inconsistencies that feed back into retraining and SOP improvement.
- Built internal productivity tools (below) using AI assistants and prompt engineering to speed up manual review steps.

Catalogue Specialist • Amazon Prime Video ***(May 2022 – Jan 2024)***

- Tagged and classified Prime Video titles with high accuracy across global catalogues.
- Flagged content violating safety, copyright, and legal policy for escalation.
- Performed first-level data labeling that fed downstream AI classification systems.

PROJECTS

Persona – Personal Productivity Coach (live app) *(React, PWA, Web Crypto, in-browser AI text-to-speech, Gemini API)*

- Built and shipped a mobile-first app that logs daily tasks, finds energy and time patterns, and plans the next day with explainable rules. Live: pritam2404.github.io/persona
- One-tap coach video generated fully in the browser (AI voice + captions) in 8 Indian languages; PIN lock with AES-GCM encryption; privacy-filtered AI chat; 26 automated tests.

AID – AU Doubt-Finder *(React, Supabase, LLM prompt design)*

- Designed a web tool that lets auditors raise classification doubts and get SOP-grounded guidance, with a GenAI roadmap for auto-suggesting answers from policy text.
- Wrote the grounding prompts and guardrails so AI responses stay anchored to the SOP instead of hallucinating.

Caption Content-Descriptor Auto-Tagger *(Python)*

- Built a Python tool that scans caption/subtitle files and pre-flags content descriptors (language, drugs, violence, sex) against Australia classification rules to speed up manual review.

Khoj – Quality Operations Tool *(React dashboard)*

- Prototyped a dashboard to surface quality trends, calibration gaps, and SOP defects in one place for the AU audit team.

SOP Defect Register & Calibration Analysis

- Analysed a live calibration workbook to identify the highest-disagreement elements and concrete data-quality defects, producing an evidence base for fixing ambiguous policy rules.

EDUCATION

B.Tech • Calcutta Institute of Engineering & Management *(2020)*

CERTIFICATIONS & LEARNING

- SQL for Data Science • Excel for Data Analysis
- Self-directed: Python foundations, prompt engineering, Power BI (in progress)

LANGUAGES

English • Hindi • Bengali
